

Compatibility

This product has been tested with the most commonly used herbicides as well as certain fungicides.

Incompatibility

Not recommended for combined application with strong acids, alkalis or strong bases.

Storage conditions

Store in a well-ventilated place. Keep container tightly closed. Store at room temperature. Avoid sources of heat, radiation, static electricity and contact with food.

Handling Precautionary statements

Keep out of reach of children. Do not eat, drink or smoke when using this product.

First Aid

In case of problems, consult a doctor with the SDS of this product.

IN ORDER TO AVOID RISKS TO PEOPLE AND THE ENVIRONMENT, FOLLOW THE INSTRUCTIONS FOR USE

Environmental risk mitigation

This product is not classified as hazardous to the environment. Keep product away from drains, surface and underground water.

Disposal conditions

Dispose of contents/container according to the separated collection system used in your municipality

Conditions of Sale and Warranty

It is shown that the product, stored and used in accordance with our instructions, perfectly fulfills its mission. However, since its application is out of our control, our company does not accept any responsibility concerning any damage resulting from its bad use and/or storage. The company guarantees the considered quality of the product.

Follow the recommendations indicated in the safety data sheet.

GUARANTEED ANALYSIS

Total Nitrogen (N).....	6 %
6 % Ammoniacal Nitrogen	
Sulfur (S).....	13 %
Manganese (Mn).....	1 %
1 % chelated Manganese (Mn)	
Zinc (Zn).....	1 %
1 % chelated Zinc (Zn)	

Derived from: Ammonium thiosulfate, Manganese EDTA and Zinc EDTA.

Information about the components of this lot of fertilizer may be obtained by writing to Idai Nature USA Corp at the address listed above and giving the lot number, which is found in the lower left area of the label.

Information regarding the contents and levels of metals in this product is available on the internet at <http://www.aapfco.org/metals.html>

PRODUCT INFORMATION

IGNEOUS provides a source of essential nutrients that correct their deficiencies. This product has positive effects on the vigor of plants. The nitrogen present improves the synthesis of chlorophyll molecule, nucleic acids and proteins. Its sulfur-based composition facilitates the synthesis of amino acids (cysteine, cystine and methionine) and vitamin synthesis. Mn and Zn in the product contribute to the correct functioning of several biological processes including photosynthesis, respiration and nitrogen assimilation.

Directions for use and application

Due to its total absorption, IGNEOUS is indicated for both foliar and soil application. A neutral pH in the application is recommended.

Foliar application : 0.2 - 0.6 fl. oz/gallon
Soil application : 0.2 - 0.3 gal/acre
